INDEX TO VOLUME XV, 1961

Adaptation, evolution of, in termites, 117
Algae, soil; ecological niche relationships, 228
Alston, R. E., 352
Anolis, thermal relations, 98
Antibodies, in cattle, 196; in Columbidae, 31
Antigens, cellular, in Columbidae, 30; in American buffalo and domestic cattle, 196; in bullfrog tadpoles, 267
Aspects, ecological, of flower evolution, 44
Bacteriophage, conditions for existence, 153; general properties, 153; population dynamics, 157
Baker, H. G., 378
Barrier, East Pacific and marine shore fishes, 545
Beetles, lycid, mimetic assemblages, 15
Birch, L. C., 360
Birds, variation in wing length and body size, 180
Bison bison, taxonomic status, blood groups, 196
Blair, W. F., 352
Bos taurus, taxonomic status, blood groups, 196
Bowman, R. I., 407
Briggs, J. C., 545
Brncic, D., 92
Buddleia, polyploidy, phylogeny, photoperiodism, 272
Bufo, secretory substances of paratoid glands, 352
Bullfrog populations, histocompatibility, 267
Campbell, A., 153
Carson, H. L., 496
Chang, W-T., 326; 418
Characters, vestigial, of termites, 115
Christiansen, K., 288
Chromosome divergence in *Tripsacum* and *Zea*, 394
Chromosome fitness changes, in *Drosophila persimilis*, 340
Chromosome interchange in rye, consequences of, 145
Chromosome polymorphism in *Drosophila persimilis*, 535
Chromosome types in rye, survival of, 145
Classes, zoophilous, flower, 44
Clatworthy, J. N., 209
Clifford, H. T., 455
Cohabitation of closely related species, 222
Collembola of caves: convergence and parallelism, 288
Color, aposematic, in *Dasypeltis*, 72; in lycid beetles, 15
Color, mimetic, in lycid beetles, 15
Color pattern, variation in *Dasypeltis*, 77
Color, procryptic, in *Dasypeltis*, 72
Color variant in *Plethodon cinereus*, 281
Columbidae, cellular antigens, 30
Competition, isoallelic, in *Drosophila melanogaster*, 239
Competition, larval and tetrapod origin, 566
Cook, L. M., 478
Copepod, *Phyllocola petiti*, possible phylogeny, 564
Corn and *Tripsacum* chromosome divergence, 394
Crassulaceae, cytotaxonomic problems, 375
Cytotaxonomy, some problems, in Crassulaceae, 375
Dacus, natural selection between two species, 360
Daly, K., 60
Dasypeltis, mimicry, 72
del Solar O., E., 401
Dendroica kirtlandii, breeding habitat; cowbird parasitism, 174
Denman, N. S., 566
Dobzhansky, T., 263 (Book review); 461
Donald, H. P. (Book review), 380
Drosophila ananassae, peculiar gene arrangements, 486
Drosophila gaucha, courtship and sexual isolation, 401
Drosophila melanogaster, heat resistance, geographical variation, 1; heterosis; fitness, 496; isoallelic competition, 239
Drosophila pavani, courtship and sexual isolation, 401; integration of genotype, 92
Drosophila persimilis, chromosomal fitness changes, 340; mating propensity of homokaryotypes, 535
Drosophila pseudoobscura, developmental homeostasis, 132; frequencies and allelism of lethal factors, 447
Drosophila serrata, evolutionary status, 461
Drosophila simulans, heat resistance, geographical variation, 1
Dunn, L. C., 385
Ecological niche of soil algae, 228
Ecotypic differentiation, 166
Edibility of lycid beetles, 23
Eisner, T., 15
Emerson, A. E., 115
Epling, C., 447
Eumenidae, Indo-Australian, evolution, 468
Evolution, floral, in Gramineae, 455
Evolution, flower, ecological aspects, 44
Evolution in Indo-Australian wasps, 468
Evolution of Müllerian mimicry, 567
Evolution, progressive, correlated with regressive, 118
Evolution in pseudogamous *Ranunculus auricomus*, 510
Evolution, regressive in termites, 115
Feeding specialization of moth *Panaxia*, 478
Fishes, marine shore, distribution, 545
Fishes, *Poeciliopsis*, reproductive mechanism, 302
Fishes, trans-Pacific shore: list, 552
Freire-Maia, N., 486
Gamodemes, *Plantago lanceolata*, leaf length responses, 166
Gans, C., 72
Gene arrangements in *Drosophila ananassae*, 486
Genetic drift in *Rattus rattus*, 259

Gotto, R. V., 564
Gramineae floral evolution, 455
Gregor, J. W., 166
Grüneburg, H., 259
Haas, R., 267
Habitat segregation in *Anolis*, 99
Hadorn, E., Developmental genetics and lethal factors (H. P. Donald), 380
Hamilton, T. H., 180
Homokaryotypes, mating propensity, *Drosophila persimilis*, 535
Harper, J. L., 209
Heat resistance in *Drosophila*, 1
Heiser, C. B., Jr., 247
Helianthus annuus, hybrids, changes in variation pattern, 60
Helianthus Bolanderi, hybrids, changes in variation pattern, 60
Helianthus petiolaris, morphological and cytological variation, 247
Heterosis and fitness in *Drosophila melanogaster*, 496
Hildemann, W. H., 267
Hochman, B., 239
Homeostasis, developmental, in *Drosophila pseudoobscura*, 132
Homeostasis in termites, 118
House mice, dynamics of a variant *t*-allele, 385
Huheey, J. E., 567
Hunsaker, II, D., 352
Interchange in chromosomes of rye, 145
Inversions in chromosomes of *Drosophila pavani*, 92
Irwin, M. R., 30
Kirtland's warbler, cowbird parasitism; population, 174
Klots, A. B., 15
Koref-Santibañez, S., 401
Lampreys, European: life-history, systematics, distribution, neoteny, speciation, 523
Langer, B., 535
Lethal factors within and between gene arrangements in *Drosophila pseudoobscura*, 447
Levene, H., 385
Li, C. C., 535
Linsley, E. G., 15
Lizards, *Anolis*, thermal regulation, 98
Lycopersicon, seed dormancy, 407
Maguire, M. P., 394
Mallah, G. S., 1
Mammals of Australia, historical zoogeography, 431
Marklund, G., 510
Marler, P. (Book review), 382
Mather, W. B., 461
Mating propensity, estimation, 543
Mattoni, R. H. T., 447
Mayfield, H., 174
McNaughton, I. H., 209
Miller, W. J., 30; 196
Mimetic assemblages, lycid beetles, 15
Mimic model conditions, 85
Mimicry: Batesian, in snakes, 85; in lycid beetles, 15; Müllerian, evolution of, 567; Müllerian, in snakes, 85; in snakes, *Dasypeltis*, 72
Moore, R. J., 272
Morishima, H., 326
Moth, Food-plant specialization, 478
Natural selection between two species of fruit fly *Dacus*, 360
Natural selection, influence on hybrid *Helianthus*, 67
Neoteny in European lampreys, 530
Oka, H-I., 326; 418
Oryza perennis, differentiation in, 326; hybrids between *O. sativa*, 418
Oryza sativa, differentiation in, 326; hybrids between *O. perennis*, 418
Panaxia dominula, food-plant specialization, 478
Parasitism of Kirtland's warbler by cowbirds, 174
Parker, B. C., 228
Paratoid gland secretory substances in *Bufo*, 352
Pattern resemblance, in snakes, 86
Peromyscus truei species group, social discrimination, 555
Photoperiodism, phylogeny, polyploidy in Old World *Buddleia*, 272
Phyllocola petiti, possible phylogeny, 564
Phylogeny, polyploidy, photoperiodism in Old World *Buddleia*, 272
Pigeons, cellular antigens, 30
Pijl, L. van der, 44
Pittendrigh, C. S., chrmn., Biological clocks: Cold Spring Harbor Symposia Quant. Biol. (P. Marler), 382
Plantago lanceolata, leaf length responses of gamodemes, 166
Plethodon, color variant, 281
Poeciliopsis, reproductive mechanism of unisexual and bisexual strains, 302
Pollen vectors, gallwasp (*Blastophaga*) of fig tree (*Ficus*), 378
Pollination of zoophilous flowers, 44
Polyploidy, phylogeny, photoperiodism in Old World *Buddleia*, 272
Population dynamics of a variant *t*-allele in house mice, 385
Populations, closely related species, 209
Populations of *Drosophila ananassae*, gene arrangements, 486
Populations of *Drosophila melanogaster*: heterosis, fitness, 496
Populations, euryokous, in beetles, 2
Populations, experimental, of *Drosophila persimilis*, 340
Populations, geographic, of *Drosophila pavani*, 92
Populations, *Helianthus*, 60
Populations, *Rana*, histocompatibility in, 267
Populations, stenokous, in beetles, 2
Populations, Wild Rice, directions of differentiation, 326
Predation on lycid beetles, 24

Pseudogamy and evolution in *Ranunculus* group, 510
Ranunculus auricomus, evolution, 510
Rattus, genetic drift, 259
Rees, H., 145
Rensch, B., Evolution above the Species Level (G. G. Simpson), 112
Reproduction, mechanism in unisexual and bisexual *Poeciliopsis*, 302
Reproductive isolation, effect and fate in *Helianthus* populations, 67
Rick, C. M., 407
Rousi, A., 510
Ruibal, R., 98
Sagar, G. R., 209
Salamander, color variant, 281
Schultz, R. J., 302
Secretions of paratoid glands in *Bufo*, 352
Seed dormancy in Galápagos tomatoes, 407
Simpson, G. G. (Book review), 112; Principles of Animal Taxonomy (Th. Dobzhansky), 263; 431
Skin homografts in bullfrog populations, 267
Snakes, mimicry in *Dasypeltis*, 72
Social discrimination between *Peromyscus comanche, nasutus, truei*, 555
Soil algae, ecological niche relationships, 228
Species closely related, evolution and ecology, 209
Spiess, E. B., 340; 535
Springtails, cave forms, convergence and parallelism, 288
Stebbins, G. L., 60
Stormont, C., 196
Sun-flowers, changes in variation pattern, 60; morphological and cytological variation, 247
Suzuki, Y., 196
Syndrome, co-adaptive, in zoophilous flowers, 50
Tamsitt, J. R., 555
Tantawy, A. O., 1; 132
Temperature effects in *Drosophila*, 1
Termites, vestigial characters; regressive evolution, 115
Tetrapod origin and larval competition, 566
Thurow, G. R., 281
Tinderholt, V. E., 447
Tripsacum and *Zea* chromosome divergence, 394
Turner, B. L., 228; 352
Uhl, C. H., 375
Variation, geographical, *Drosophila*, 1
Variation in hybrid *Helianthus population*, 60
Variation, intraspecific in wing length and body size in birds, 180
Variation, morphological, cytological in *Helianthus petiolaris*, 247
Vecht, J. van der, 468
Warburton, F. E., 566
Wasps, Indo-Australian, evolution of, 468
Watson, P. J., 166
Wild rice, directions of differentiation in populations, 326
Zanandrea, G. S. J., 523
Zea and *Tripsacum* chromosome divergence, 394
Zoogeography, historical, of Australian mammals, 431
